**Framework :** Django Python

## Project

### Inventory Management E-commerce Web App: [\(source code\)](#)

- Developed a e-commerce application featuring a user registration and login system with distinct user and admin panel
- Integrated a payment gateway using stripe , enabling users to make secure transactions while boosting payment efficiency
- Built a dynamic admin dashboard that allows administrators to add products manage inventory , and view user orders, streamlining operations and enhancing decision-making
- Designed and implemented the backend using Django Models for efficient database management , ensuring scalability and reliability
- Technologies used - Django, Python, Stripe API, Django Models

### Front-end E-commerce web / [E-commerce](#) / [\(source code\)](#)

- Built a fully functional and responsive e-commerce website using React and Redux Toolkit showcasing expertise in fron-end development and state management
- Implemented dynamic Add to Cart functionality with Redux , allowing real-time item updates(add , remove) without page reloads , ensuring a seamless user experience
- Designed and optimized a modern and responsive user interface using Tailwind Css and media queries, ensuring compatibility across mobile, tablet, and desktop devices
- Smooth interaction between product pages and the cart demonstrating proficiency in managing component state and enhancing user engagement
- Technology used - Reactjs, Tailwind Css , Redux Toolkit

## Work Experience

### Technosoft Engineering Intern

Oct 2024 - Jan 2025`

#### Web developer

- Worked as a **Front-End Developer Intern**, contributing actively to the development of dynamic and user-friendly interfaces for web applications.
- Collaborated with the development team to create responsive front-end components using **HTML, CSS, JavaScript**, and **React.js**, ensuring an intuitive user experience.
- Contributed to the design and implementation of **functionalities** like **navigation menus, forms, and interactive elements**, improving the overall user interface.
- Participated in regular team meetings to discuss design ideas, code quality, and project updates, contributing valuable insights to enhance the functionality of the platform.
- Gained hands-on experience with front-end tools and frameworks, improving the speed and quality of web page load times and user interactions.
- Worked on maintaining and improving the **UI/UX** of existing features, ensuring consistency and usability across different devices and screen sizes.
